DETAILED ACTION

Claim Objections

1. Claims 11, and 13-18, are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim do not recite a selection of one from a plurality (eg. any one of claims 1, 2, or 5; rather than according to 1, 2, or 5. See MPEP § 608.01(n). Accordingly, the claims 11, and 13-18 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Ikawa et al. (2006/0101984).

Ikawa et al. disclose a musical performance self-training apparatus for supporting a player by displaying a performance instruction information on a display means, comprising: a unit designating means (10) for designating a unit from the plural units (20), the units (20) constitute a music to be performed and each unit includes a predetermined size of musical tone information, and a performance instruction

information generating means (30) for generating the performance instruction information based on the musical tone information of the unit which is designated by the unit designating means.

Ikawa et al. disclose the musical performance self-training apparatus, further comprises a lesson menu generating means for generating an image information of a lesson menu which has a score of the music to be played and the units corresponding to the score, then output the image information to the display means, wherein the unit designating means designates a unit automatically, which unit corresponding to the score of the performance instruction information to be displayed next (page 3, paragraph 47).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-7, and 12, are rejected under 35 U.S.C. 103(a) as being unpatentable over Ikawa et al. (2006/0101984).

Ikawa et al. are discussed above. Ikawa et al. do not disclose an automatic and manual mode.

However Official Notice is taken with respect to it being well known in the art to provide music lessons or scores in automatic and manual progression modes.

Art Unit: 2837

It would have been obvious to one of ordinary skill in the art at the time of the invention to utilize the teachings of the well known teachings in the art, because these teachings allows control over the progress of the lesson distribution.

Ikawa et al. are discussed above. Ikawa et al. do not disclose the size of the unit. It would have been a matter of design choice to change the size of the unit, since such a modification would have involved a mere change in the size of the component. A change in size is generally recognized as being within the level of ordinary skill in the art. In re Rose, 105 USPQ 237 (CCPA 1955).

Allowable Subject Matter

5. Claims 3, 4, and 8-10, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
